

SECURATRAK PRODUCT SHEET

Satellite Asset Tracking - AT4

PRODUCT DESCRIPTION

The Securatrak AT4 is a **LOW COST** solution that gives you the ability to locate YOUR important assets whenever and wherever they may be. The AT4 is fully integrated with our Geotab Fleet Management Software, and provides the following reporting functionality PLUS more;

- Last known location in Map View or longitude & latitude reference.
- Reporting of location in pre-programmable timed intervals.
- Reports movement of your assets via a motion sensor.

This "Slim Line" addition to our range of Satellite Tracking products, provided for a simple installation where there is limited space or a "covert" installation is required.

Long Life Battery

2+ year battery life using two (2) "off the shelf" AA lithium batteries or 4+ years with four (4) "off the shelf" AA lithium batteries, based on 2 updates/day.

Accessories:

Open Door sensor
Bare wire cable.
USB Configuration Cable.
Sled or Adhesive Mounts.

Supervisory position reporting:

Wake, GPS locate, Transmit location, Re-sume sleep.
Up to 12 programmable sleep intervals or time-of-wake settings.

Field Programmable using laptop and USB Configuration Cable.

Interval Override:
